

Do You Use US-1 Through The Town of Lexington?

SCTA and Clifton Parker (G&P, Citizen/Resident, DOT Commissioner) met recently with the Mayor of Lexington and an engineering firm they have hired to do a master plan for Lexington to discuss traffic issues. We had an excellent meeting and both perspectives were shared and respected. SCTA would like to encourage its members to review their routing and avoid Main Street (US 1) through the Town of Lexington during the daytime whenever possible. There are various alternative routes which might be reasonable – depending on your individual operation.

The SC Department of Transportation would likely not allow the Town of Lexington to impose a truck restriction because it is after all – US 1. And with the Town lacking a reasonable safe and efficient bypass route that would not be acceptable.

We encourage our members to look at this route and discuss possible alternatives with their drivers. SCTA may be asking for member input on this and if you see that request, please participate.

SCTA thanks the Dennis Corporation and the Town of Lexington for reaching out through this voluntary effort.
