

Dennis Corporation Internship Program

Dennis Corporation recognizes the unique value of internships and on-the-job training opportunities in mentoring students for a career in the Engineering and Surveying profession. Of its current 100 employees, Dennis Corporation employs six interns. These interns, who work for different divisions of the firm, gain important experience from hands on work that they cannot receive in school.

The following testimonials illustrate the invaluable experience that Dennis Corporation's Internship Program has given these students.

"Working as an intern with Dennis Corporation, I was able to gain valuable experience to prepare me for a career in Civil Infrastructure. Now as a full time employee of Dennis Corporation, I am able to apply what I have learned as an intern and in the classroom on projects for our clients."

Kimberly Swygert, EIT, 2007 Graduate of Intern Program and Current Assistant Civil Engineering Manager

"My two years at Dennis Corporation helped me develop skills that I have been able to use during my internship, as well as in my future career. Dennis Corporation allowed me to think outside the box in order to attain team goals that drove the success of the company. I know that my experience with Dennis Corporation is going to benefit me for the rest of my life."

Asher Hannah, 2008 Graduate of Intern Program through the Marketing Department

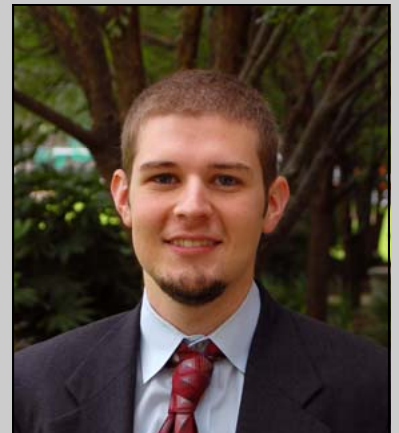

"Dennis Corporation helped me get hands-on experience in my field of study, which is Civil Engineering. I assisted in designing many different types of projects, which also helped me understand subjects covered in my engineering classes."

Yesim Yazgan, EIT, 2008 Graduate of Intern Program and Current Engineering Associate

“

Dennis Corporation has provided much more experience in a few days than an entire semester as a student in my junior year of a Civil Engineering program. The vast spectrum of projects and opportunities allows me to develop multiple skills in various areas involved in the engineering community, rather than just a narrow field of expertise. The working environment is supportive, encouraging and resourceful. I'm looking forward to the opportunities and challenges Dennis Corporation will provide me in the future."

Matthew Watson, EIT, 2008 Graduate of Intern Program and Current Dennis Corporation Roadway Design Associate

Career Fairs

As part of our commitment to recruiting students for the mentoring program, Dennis Corporation regularly attends career fairs to recruit college students into our internship program. Most recently, Dennis Corporation staff attended an Occupational Career Fair on September 12, 2007 at SC State University and interviewed over 25 civil engineering intern candidates. While at the career fair, Dennis Corporation personnel also met with several school officials and went live on-air with the on-campus radio station to promote our recruiting efforts.

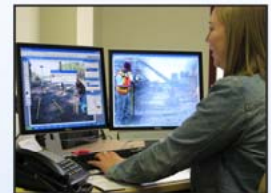

Dennis Corporation Design Technician, Willie Pelzer goes on-air with the SC State on-campus radio station to promote Dennis Corporation and recruit students while at the SC State Career Fair.

Dennis Corporation Special Projects Manager, Mr. Tim Sharpe setting up a recruiting station at the SC State Career Fair.

EMPLOYEE BENEFITS
